**Eagle Network Solutions Renews Pentagon Renovation Contract with  
General Dynamics Network Systems**

**Burlington, VT/ Arlington, VA, September 15, 2003** – Eagle Network Solutions has been retained by General Dynamics Network Systems to continue participating in the Pentagon Renovation Program. Eagle Network Solutions is a Vermont-based data networking and telecommunications firm.

“ENS’s work with General Dynamics on the PenRen program has already led to major successes,” said Tim Banks, managing partner at Eagle Network Solutions. “This project provides a unique opportunity to positively impact our national defense agencies through the efforts of our experienced and dynamic engineers. Our partnership with General Dynamics continues to bring great value to both firms and the United States government.”

**About Eagle Network Solutions:**

ENS is a Burlington, Vermont-based technology engineering and research firm with a focus on critical voice, video, data and convergent networks. A unique complement of extensive process-based laboratory research experience with extensive field-based practical deployment, operations and maintenance allows ENS to employ a comprehensive approach to any network-centric solution. Deep expertise in emerging technologies and the integration of these technologies with existing infrastructure keeps ENS poised to design, test and build networks capable of delivering robust, secure and dynamic data and media content. ENS solutions revolve around open standards of interoperability suited to the development of joint tactical platforms of communication. As policy consultants, ENS provides IT and IT security policy analysis and development services to state and federal governments as well as to private commercial entities and NGOs.
